DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 2-6 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Claims 2-6 recite "interaction agent" and there is no description for "interaction agent" in the written description. Page 13 line 15 mentions "interaction agent" without defining what the agent/s is/are. Claims 3 and 4 recite "interaction product" and there is no description for "interaction product" in the written description. Page 13 line 18 mentions "interaction product" without defining what the product/s is/are.

4. Claims 2-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The recitation of "interaction agent" and "interaction product" is indefinite. What is "interaction agent" and what is "interaction product"? Interaction agent may be anything

Art Unit: 1615

including water and interaction product may be any product including a solution of a solid compound or polymer in water or alcohol.

What is "hydrophobically modified polymer" in claim 5?

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Blank (US 4,533,540).

7. Claims 2-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Blank teaches a composition comprising nitroglycerine and water-insoluble vinylpyrrolidone copolymer (claim 1). The composition further one or more excipients selected from the group consisting of lactose, beta-lactose, milk sugar, fructose, maltose, sucrose, mannitol or sorbitol and thickeners (column 5, lines 50-65 and column 6, lines 33-59). The composition comprises lauroyl peroxide catalyst, vinylpyrrolidone, ethylene glycol dimethacrylate and cyclohexane (example 1). Blank teaches a method of preparing the composition and in example 1 discloses that the solvent is separated from the polymer by evaporation. The teachings of Blank meet the limitations of the claims. Applicants' claims are

Art Unit: 1615

generally recite generic composition of a polymer, solvent and a method of forming the composition by adding and mixing and evaporating the solvent.

Observation:

The examples appear to represent applicants' invention. Applicants may append claims to specifically claim the invention that is disclosed in the examples.

8. Applicants' cooperation is requested in correcting any errors of which applicants may become aware in the specification.
